

### **Position: Metrology Technician (Full Time)**

BRI Biopharmaceutical Research Inc. is a specialized analytical, LC/MS/MS bioanalytical and DM/PK contract research organization (CRO) servicing pharmaceutical and biotechnology companies in discovery, preclinical and clinical programs supporting IND and NDA-enabling studies.

The operating environment at BRI involves both office and regulated laboratory activity. We are seeking highly motivated and dedicated individuals who will enjoy and thrive in a continuous learning team environment as a career track in a rewarding pharmaceutical contract research industry.

The department of metrology is responsible to ensure all equipment and instruments within BRI are qualified, calibrated, maintained and repaired as per BRI's standard operating procedures

### **Key Responsibilities:**

- Conducting laboratory equipment maintenance, instrument calibration & qualification
- Performing daily monitoring of critical instruments
- Assuring the correct processing of all new lab equipment, arranging and tracking equipment repairs, servicing and qualification
- Conducting scheduled preventive maintenance and corrective maintenance activities on laboratory equipment on an ongoing basis
- Install new equipment and its operating software
- Organizing and monitoring the usage of logbooks for instruments and supplies
- Adhering to all BRI quality assurance policies and procedures as well as those prescribed under the US FDA and Health Canada HPFB regulations.
- Performing other related duties as assigned

### **Qualifications:**

- Minimum post secondary education in science related fields is required
- A responsible team player with attention to detail and the ability to communicate effectively with others
- The ability to observe and interpret data/information, problem solve, use mathematical reasoning and perform detailed work under changing priorities.
- Competent and self-motivated individual able to work independently
- Excellent computer skills, with proficiency in Microsoft Office
- Must have strong organization and multi-tasking skills
- Knowledge of US FDA as well as Health Canada HPFB GLP and cGMP regulations would be an asset

### **How to Apply:**

Please submit a current CV or Resume with Covering Letter detailing how you meet the specified requirements to:
